

## PELICAN EQUIPMENTS

### 5.2 Verification of design documentation:

Objective : To ensure that equipment is adequately documented and this Documentation is under appropriate document control.

Procedure : Verify design document

### 5.3 Verification of standard operating procedure:

Procedure : To verify the availability of standard operating procedure

### 5.4 Verification of training record:

Procedure : The required personnel have received the training and they Understand and are capable of executing the given procedure.

Method of verification : Evaluation of personnel.

Name of person	Department	Date of training	Training evaluation sheet	Verified by/ date
Mr. Arkala Prasad	Sr.Officer-Procurement	08.02.2024	INSTALLATION REPORT	08.02.2024
Mr. V.TARUN	Sr.Executive	08.02.2024	INSTALLATION REPORT	08.02.2024

### 6 Verification of performance of the system:

Objective : To verify that the performance of the system and establish that Control system performs as specified.  
1. Verify the accuracy of temperature.  
2. Verify the accuracy of result.

Procedure : Check the temperature of the system at various temperature using Calibrated temperature controller. Verify and confirm the Temperature of the system at various points with the calibrated Controller.  
Run a standard sample and check the final value of analysis with the Standard sample.
