

Integrated Management System Policy

We produce and deliver safe and efficacious bio-pharmaceuticals using environmental friendly processes and by giving due importance to the health & safety of employees and the society.

We achieve this through continual improvement of the integrated management system, manufacturing processes, industrial safety measures and competencies of the personnel working for us.

We are committed to prevent pollution of the environment, injury and damage to health of our people in their work environment. To this end, we will comply with all statutory and regulatory requirements.

We are also committed to enhancing customer satisfaction and experience of customers with our products and services.
